LSTM outperformed ARIMA by a wide margin.

Our LSTM-powered price forecasting model has since been advanced and now achieves extremely high accuracy.

Recommendations

Disclaimer: American tariffs have vastly damaged the global investor confidence in cryptocurrency, generating significant losses across almost all major cryptocurrencies.

Due to this unfortunate situation for cryptocurrencies and in alignment with our data-backed findings, we recommend (with high confidence):

SELL

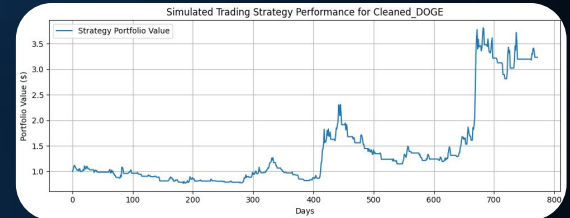

Solana

Ripple

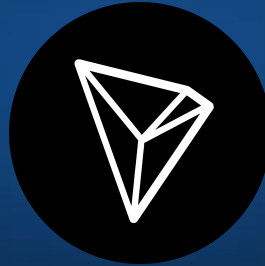

Doge

For those willing to accept high risk rates and moderate confidence for high potential returns:

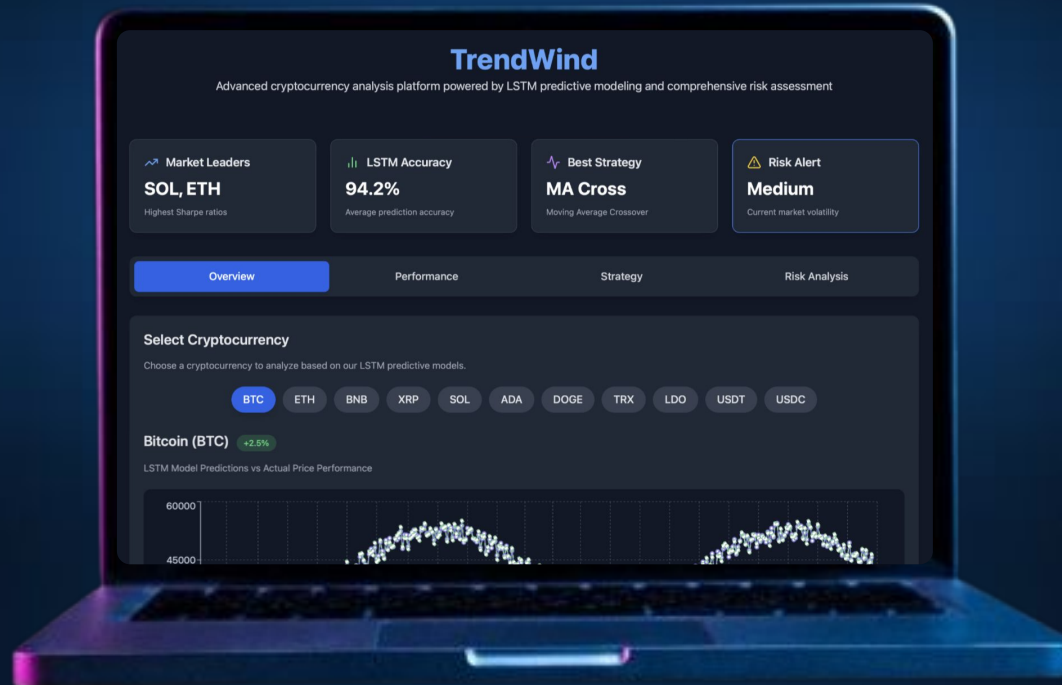

BUY

Tron
